King case, alleged irrelevance of 100-4105 at Memphis: Memphis "search" HW 8/10/84

In going over some of my subject-file copies for Theoharis today I noticed copies of these two MURKIN records from Sub 2 or Sub 1 and 2. Quite literally one is the first record in the Memphis MURKIN record, the notification of the crime to the FBI. The second is one of the earliest, FBIHQ's orders to enter the case.

Both were originally "To:FILE (100-4405)" when typed. Is this not the file on the advance warning of the threat that the FBI originally withheld and then resisted disclosing on the ground that it wasn't relevant?

In addition to all else that is obvious if I am correct in this, does it not reflect the fact that no search was ever made in Memphis because, if there had been a search, obviously 100-4105 would have been included on the search slips (never provided).
